Building the Belt and Road Initiative in the Arab World

China's Middle East Math

Jonathan Fulton

This book analyzes the expansion of Chinese power in the Middle East North Africa (MENA) through Belt and Road Initiative projects undertaken in the '1+2+3 cooperation pattern'. Under this framework 1 represents energy, 2 represents infrastructure and trade and investment, and 3 represents nuclear energy, space satellite, and renewable energy. Taken together these elements indicate the trajectory of China's MENA presence, and by examining each element in different states across the region this book provides empirical evidence of which states or subregions are most important for Beijing's regional ambitions, as well as a better understanding of which sectors are being developed.
