Iran and the Bomb

The United States, Iran, and the Nuclear Question

Sina Azodi

"Sina Azodi's book is an excellent history and analysis of Iran's nuclear enrichment program. He explains the motivational and strategic logic of the program, tilting neither toward bias nor off-putting detachment. Azodi cares about the issue, but this helps rather than hinders his analysis. His sourcing is unprecedented and original, which makes this book essential reading for anyone who is interested in the issue of nuclear proliferation, Iran's foreign policy and Middle East politics." *Ross Harrison, Senior Fellow Middle East Institute, Washington, DC, US*

Iran's nuclear program remains one of the most contentious issues of modern international politics. This book is the first to trace the evolution of Iran's nuclear strategy (program) in the broader context of its relationship with the United States, from the early days of total US support in the 1950s to the staunch opposition that followed the Iranian revolution, and its reconstitution.

The account covers the pivotal moments including initial meetings to pursue uranium enrichment in Iran, key internal debates, the signing of the Joint Comprehensive Plan of Action (JCPOA), Donald Trump's controversial withdrawal and the latest efforts to revive the agreement. The book shows that because the strategic logic of the nuclear program transcends the regimes type, dismantling the Iranian nuclear program is not viable policy option for the United States. Instead, the US must learn to live with a nuclear threshold state and make it a priority to keep Iranian capacity as far away from the bomb as possible.

The research is based on American declassified documents and often marginalized Iranian primary sources including political memoirs, diplomatic correspondences, oral histories from Iranian nuclear officials and exclusive one-on-one interviews with Iranian scientists and national security officials. The account and its findings have important implications for both scholars of nuclear non-proliferation and for policymakers.

Sina Azodi, PhD is Assistant Professor of Middle East Politics at The George Washington University, US and the Program Director for M.A. in Middle East Studies Program. He previously worked as a research assistant at Princeton University's Program on Science and Global Security, US and Woodrow Wilson International Center for Scholars.
